

Unlock the Full Power of the SAT Suite

Build Student Readiness Earlier and Expand Opportunity Further

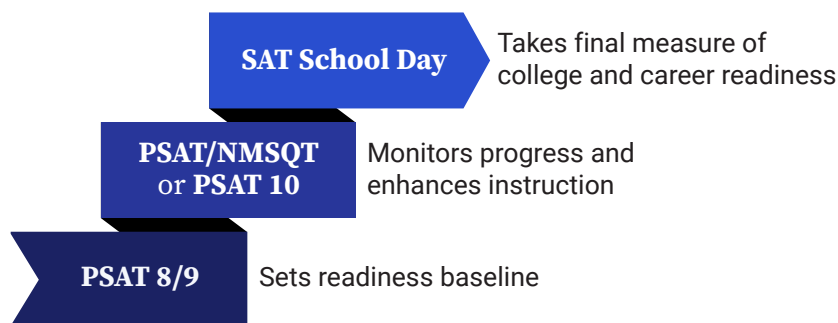

Most assessments provide isolated snapshots. The SAT® Suite of Assessments provides a connected growth strategy.

When implemented as a multiyear approach, the SAT Suite transforms assessment from a one-time event into a coherent readiness system. Beginning as early as 8th grade, districts gain consistent, comparable data that tracks real growth, informs instruction, and expands access to college and career pathways.

A Connected System for Real Growth

One scale. Multiple years. Meaningful insight.

All SAT Suite assessments are built on the same research foundation and share a common scoring scale to consistently measure students' reading, writing, and math skills. That continuity allows districts to measure progress over time—not interpret disconnected results.

PSAT™ 8/9 establishes early college and career readiness baselines.

PSAT™ 10 or PSAT/NMSQT® measures growth and connects students to practice and scholarship opportunities.

SAT School Day provides a summative, college-reportable measure of students' performance in the core skills necessary for success in college and career.

Together, they form a unified system that supports long-term academic planning—not a collection of separate testing events. With earlier benchmarks and consistent measurement, educators can identify gaps sooner, align instructional supports, interventions, and coursework that meet students where they are more precisely, and expand access to advanced coursework with confidence.

Turn Insight into Action

The SAT Suite's impact:

-  Knowledge and skills insights tied to standards
-  Skills Insight™ reporting to guide targeted support
-  AP Potential™ to identify students ready for Advanced Placement® coursework
-  Teacher implementation resources to support classroom alignment

The result: clearer signals, earlier intervention, and stronger identification of students ready for rigorous pathways.

“The SAT Suite provides a consistent, connected assessment system that tracks student progress over time and identifies areas where additional support is needed.”

Nichole Bennett, Associate Principal,
Caprock High School, Texas

Expand Student Access to Opportunity

Administered during the school day, the assessments in the SAT Suite ensure readiness opportunities are not limited to students who opt in. District-wide implementation helps:

- Remove participation barriers
- Provide every student with a college-reportable score
- Build confidence through familiarity and growth tracking
- Connect students with postsecondary insights as well as scholarship and recognition programs, including the National Merit® Scholarship Program

When used alongside tools like AP Potential, the suite also provides an objective data point that can complement teacher recommendations, course grades, and other local criteria. That additional perspective helps districts identify students who may be ready for advanced or honors coursework but might otherwise be overlooked.

A Strategic, Mission-Aligned Investment

The SAT Suite's multi-assessment pricing model supports districts committed to long-term readiness. Districts that adopt three of the assessments—PSAT 8/9, PSAT 10 or PSAT/NMSQT, and SAT—receive:

- Progressively lower per-test costs
- Additional savings when adding a fourth assessment
- Preferred pricing on Khan Academy® Districts for system-wide practice and preparation

The SAT Suite brings coherence to readiness efforts across grades 8–12, helping districts align instruction, identify gaps earlier, and expand access to rigorous pathways over time. Implemented as a connected system, it supports more informed decisions from middle school through graduation.

Simplify and Streamline Assessment

The SAT Suite is delivered digitally through Bluebook™, the same secure platform used for AP® Exams. A unified platform allows districts to:

Reduce operational complexity

Align assessment systems across grade levels

Reclaim instructional time through efficient, adaptive testing

Strengthen system-wide coherence

Instead of managing fragmented tools and disconnected data streams, districts gain a streamlined, aligned readiness system.
