

Fuel College and Career Aspirations with SAT School Day

In a single two-hour test, the SAT® provides a reliable measure of the skills students need to succeed in any postsecondary pathway. Aligned to state standards, the SAT provides insights and resources educators and students trust—coupled with unmatched flexibility, operational stability, and accessibility. By offering the SAT during the school day you can ensure every student has access to opportunity.

Adopt SAT School Day to:

Build Confidence and Readiness. When students take the SAT during the school day, they're more comfortable, confident, and likely to participate.

Plus, the SAT provides students with the most comprehensive, effective set of free practice resources available. These include seven full-length digital practice tests, a question bank with thousands of official SAT questions that can be filtered by state standards, and exclusive test prep courses on Khan Academy®. Together, these tools reinforce classroom learning and help students build the skills and confidence they need for test day.

Completing full-length digital SAT practice tests in Bluebook™ is associated with higher SAT scores. Students who completed 1, 2, or 3+ full-length practice tests scored roughly 25, 45, and 60 points higher, respectively, than similar SAT test takers who did not complete any full-length digital practice tests in Bluebook.

Break Down Barriers. Remove common obstacles like securing transportation, juggling work or family responsibilities, or navigating unfamiliar test centers. Flexible testing windows are offered in the fall (October) and spring (March and April), making it easier for districts and schools to offer SAT School Day.

Ignite Aspirations. Giving all students the opportunity to take the SAT helps them view college and career opportunities as realistic and within reach. SAT scores give students relevant, personalized, and easy-to-understand insights that connect them directly with tools that support exploration and planning for their future.

When students access their scores on the BigFuture® School mobile app, they receive information about their academic progress; a skills-based Career Insights Snapshot that shows in-demand careers in their state, planning guidance, and the chance to connect with nonprofit colleges and scholarships.

"By offering the SAT on a school day, our district ensures that all students, regardless of their background or financial situation, have access to a critical college admissions tool in a familiar, supportive environment."

Tracey Morman

Director of Counseling/College and Career Readiness
Amarillo Independent School District, Texas
